L4000I MATERIAL LOADER

Continuous-Production Material Workflow

L4000I - Material workflow loading solutions ready for production integration.

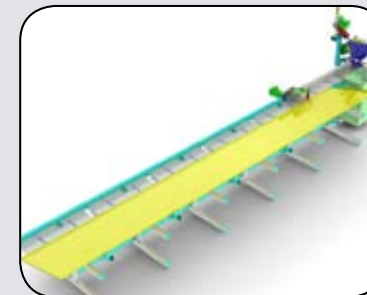

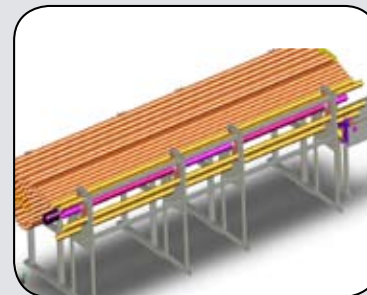

Automatic loading of flat and hollow profiles for continuous process production. Simple integration with modular automation units or retrofit installation onto your existing machinery for complete production solutions. Primary machining combined with automatic feeders and loaders for completely unsupervised production systems with set-and-forget operation.

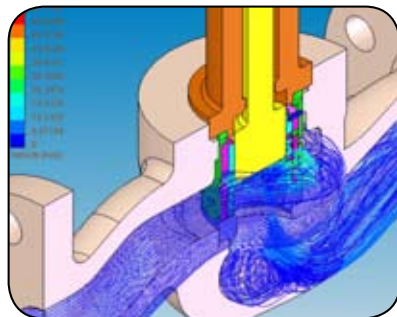

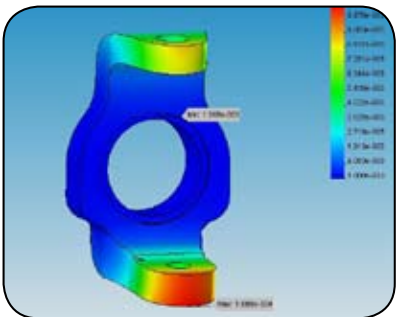

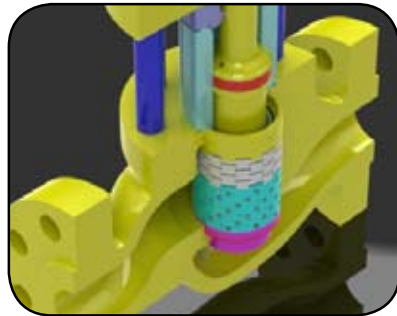

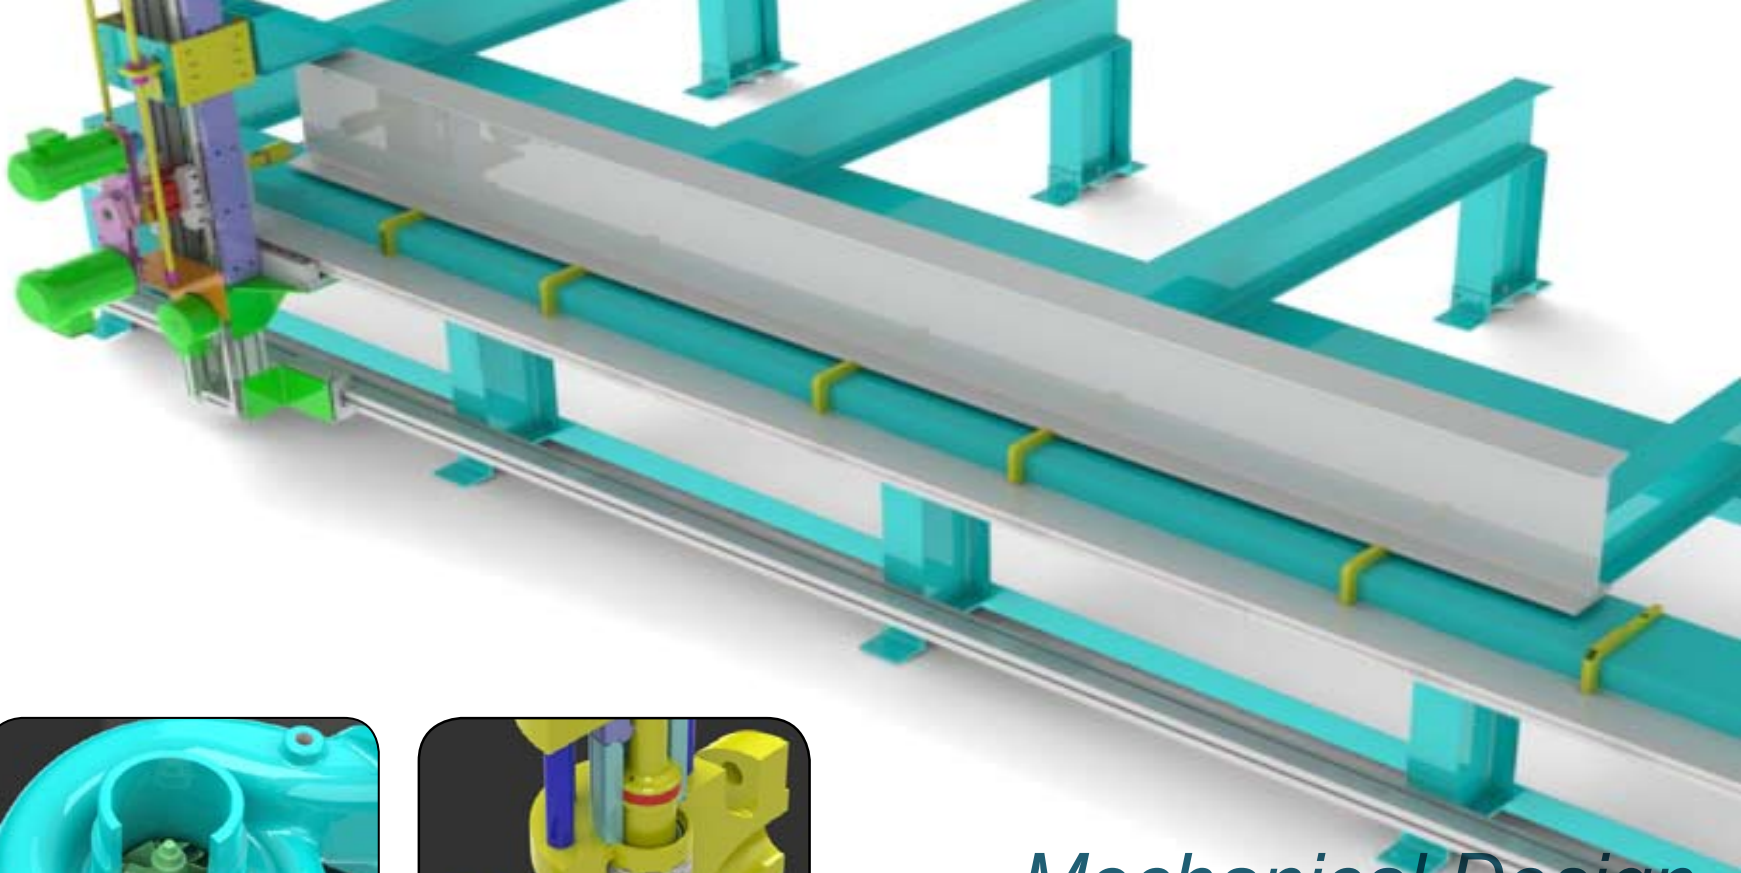

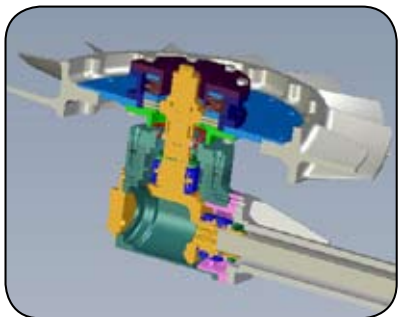

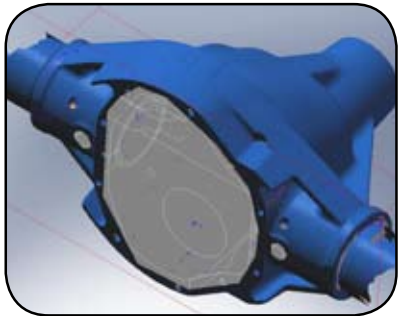

Incline, bundle and multiple storage loader designs to suit Customer process. Advanced designs utilizing direct-from-supplier material bundles – from the back of the truck and onto the machine. Custom design material feeding solutions to suit Customer applications.

Features

- Suitable for construction of multi-operation production systems
- Combining with modular automation units or retrofit installation onto your existing machines
- Profile lengths up to 6 m length, capacity up to 200 profiles
- Single profile or bundled loading with incline, bundle and multiple storage designs
