

Cutting and Drilling Modular Applications

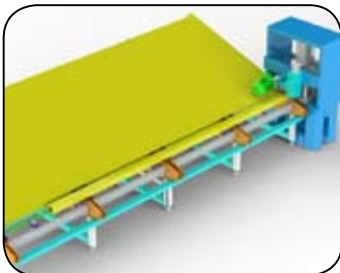

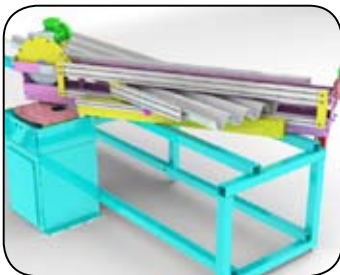

- Flexible Modular Units for Automating Everyday Machining Tasks
- Affordable Custom-Made Production Systems to Suit Process
- Advanced PLC Automation and Process Integration
- Set-and-Forget Operation with Automatic Material Feeders and Loaders
- Complete Production Solutions - Made From Scratch or Retrofit to Your Machinery
- Speed up Production, Eliminate Errors and Reduce Costs - Exceptional Production Value

Improve productivity and reduce wastage with simple modular automation. Affordable, custom-made production solutions automating everyday machining tasks.

Complete range of in-house designed / made modular units covering positioning, material flow, machining and actuation. Flexible integration into custom-made applications to suit any process. Advanced PLC automation and process integration.

If your business is production-critical you need effective automation to stay one step ahead. At Reconeng your possibilities can be endless, without your budget having to be.

Advanced Automatic Cutting Systems

- Aluminium, steel, fiberglass cutting and more
- Continuous operation saws with integrated material feeders and loaders
- Integrated cut-piece, off-cut, swarf collection and briquetting systems
- High speed cutting (300×100 mm steel sections cut in under a min)
- High capacity saws (up to 1000×300 mm)
- Miter and compound cut saws
- Long stroke saws (up to 2 m)
- Exceptional (milled) quality cut

Fully Automated Drilling Systems

- Accurate four-sided drilling in infinite hole patterns
- Automatic 2D positioning, feed and clamping
- Direct from CAD hole pattern input
- Integrated material loaders, feeders and rotation systems
- Drilling, tapping, counter-sinking, counter-boring and more
- Integrated finished piece and swarf collection systems
- Custom-made multi-spindle heads and multi-tool exchangers

- Fully optimised cut / drill feed (fast approach, slow entry, fast middle, etc.) for significantly improved tool life at maximum drill / cut productivity
- Active overload safety system modulating tool feed rate against accidental overload and jamming.
- Multi-operation applications (drill / cut / rivet / tap) process integrated for complete profile processing solutions, fully automated with unsupervised operation.
- Compact, heavy-duty, high-powered designs - machines built to last
- Full PLC control with touch-screen panel and 100+ job memory
- Full factory warranty on all machines with seven day a week engineering support
