SL 360H HEAVY DUTY SAW

Fast Accurate Steel Cutting

SL 360H – Heavy duty, high powered saw for fast cutting of large steel profiles. Cut large steel sections in under a minute with exceptional quality finish.

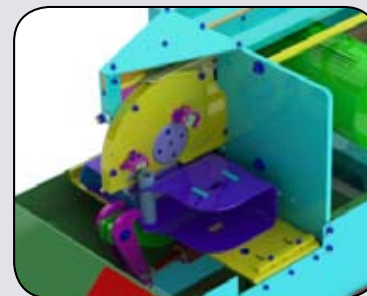

Semi-automatic operation with HMI touch screen control and customer specific clamping jigs. Large cutting capacity (300×100 mm) combined with heavy-duty / high-powered construction.

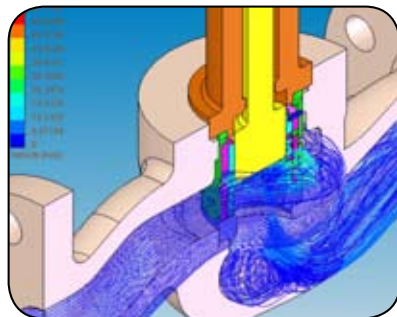

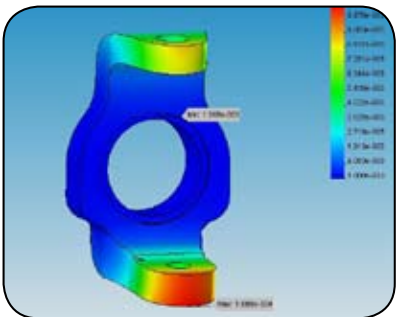

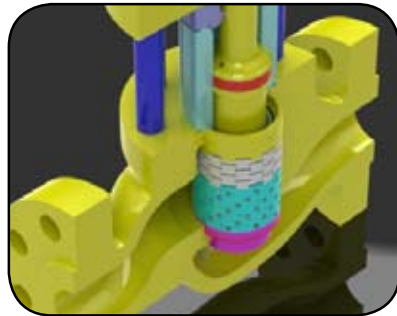

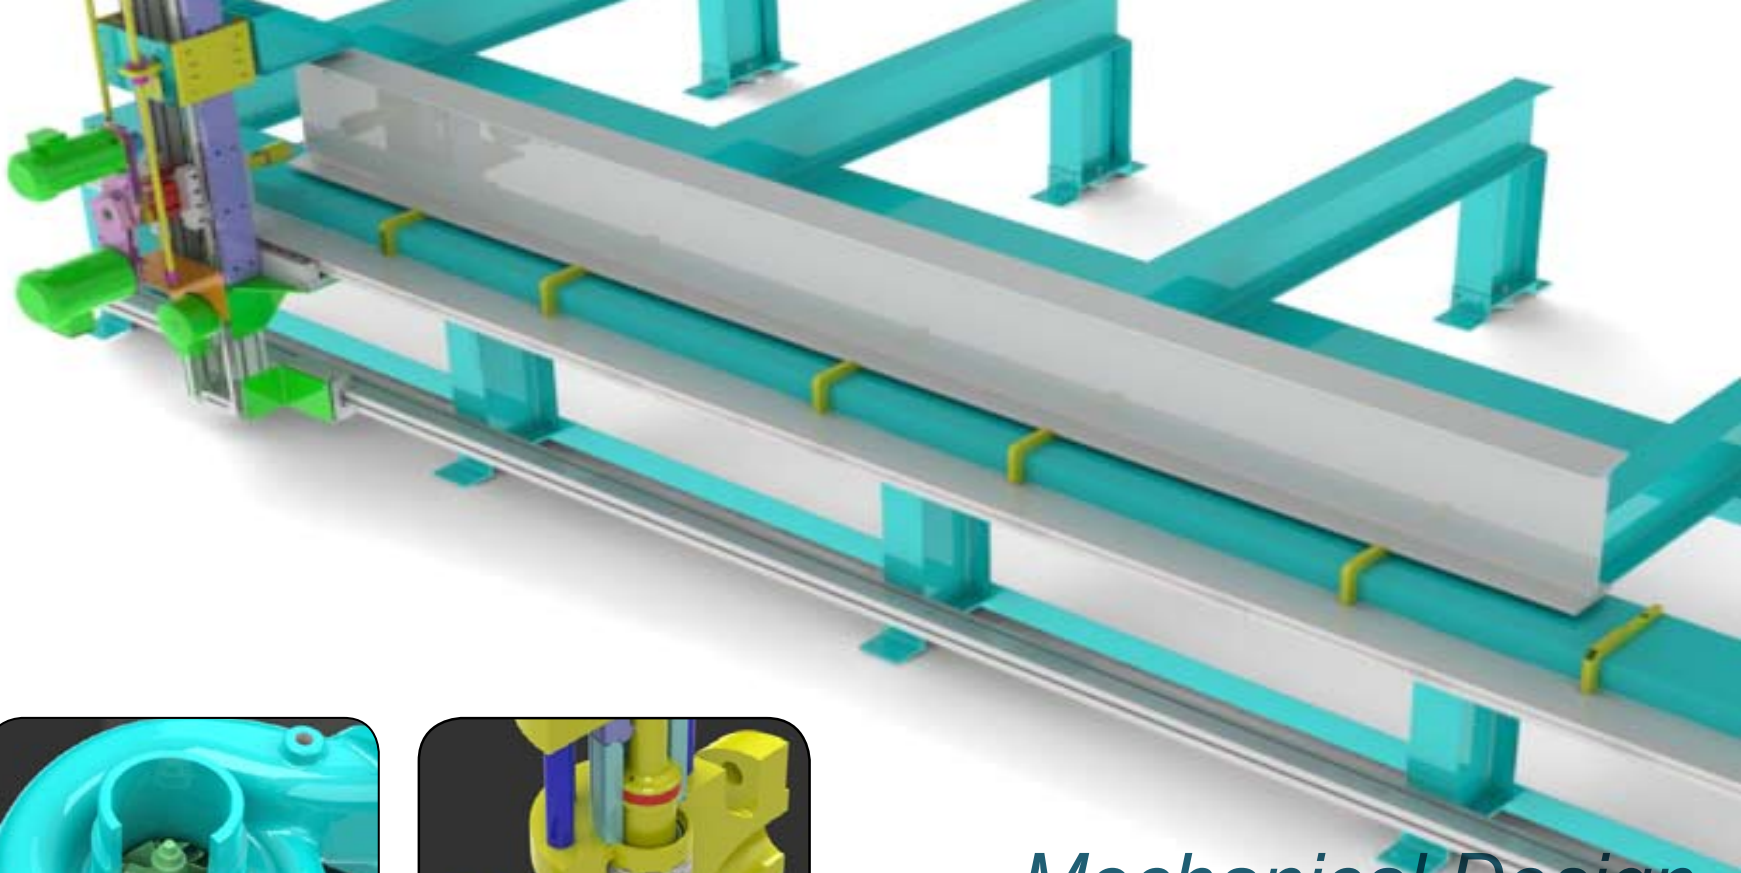

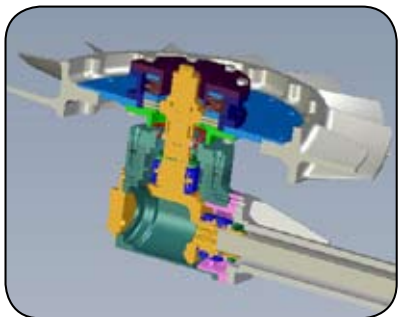

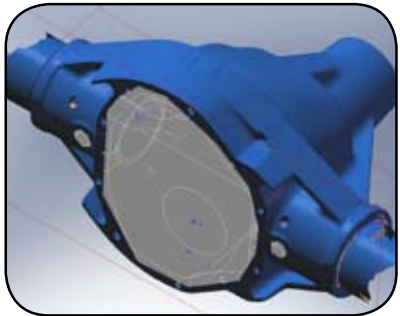

Custom-made designs to suit special applications. Horizontal or vertical working tables, special twin-blade and upstroke designs for extremely large cutting capacities. Cutting space designed for flexible jig attachment, with optional rotary table design for segment cutting of large retainers. Optional automatic profile feeder for maximum process productivity.

Features

- Semi-automatic operation with PLC touch screen control
- TCT blade with 500 mm of horizontal ball-screw actuated stroke
- Blade vibration damper with customer-specific pneumatic clamps
- Special stand with integrated swarf collection and spray mist oil lubrication
- Infinitely variable blade RPM and feed rate
- Resettable counter for current and required number of cuts
